SPRING SONG

Biographical Sketch—Edmund Neupert

Born, Christiania, Norway, April 1, 1842

Died, New York City, June 22, 1888

EDMUND NEUPERT'S father was his first teacher. At sixteen he went to Berlin where he studied with Kullak and Kiel. He taught at Kullak's Academy and at the Stern Conservatory in Berlin. At twenty-six he became leading piano teacher at the Copenhagen Conservatory and at thirty-eight he succeeded Nicholas Rubinstein at the Moscow Conservatory. In his fortieth year he came to New York where his concert-playing aroused great admiration.

In his numerous piano compositions, Neupert treads somewhat in the footsteps of Mendelssohn. His works are strongly tinged with characteristic Scandinavianisms, which probably constitute their chief charm. Grieg esteemed Neupert so highly that he dedicated to him his Concerto in A-minor.

Form and Structure: This composition is in Three-Part Song-Form. Part One (meas. 1-16) consists of a 16-measure sentence in A-major but modulating to B-major in the last two measures. Part Two (meas. 17-31) consists of an 8-measure period with a 7-measure extension. Melodically, meas. 17 is similar to meas. 1, but the tonality is that of B-minor, which passes into C-sharp minor in meas. 18, with a new tune in the same key at meas. 19-20. Meas. 21-24 are a repetition of meas. 17-20 a fourth higher. The extended passage (meas. 24-31) brings the tonality back to the dominant of A-major. Part Three (meas. 32-47) is a repetition of Part One, the last two measures being altered to end on the dominant of A-major. A coda of 5 measures concludes the piece.

Interpretation: Smoothness in playing the broken chords in the accompaniment may well be the chief task this piece sets the player. The utmost clarity in melodic delivery and superlative finish in the running passages in the right hand are also quite essential. Play the ornamental passages between the principal melody notes very delicately (meas. 2, 4, 10, 12, 33, 35, 41, 43). Work up a big climax at meas. 24-26. Observe carefully the fingering in this passage. The inner melody at meas. 19 and 23 should be played very expressively.

Music Education

vs.

Imitation of the Teacher

Music Education is no longer a luxury. It has become a part of our everyday life, and is of vital importance to every cultured person. But, there is a vast difference between a Music *Education* and the ability to move the fingers over the keyboard to produce a succession of sounds. In one case, there is initiative and musical understanding—the other is mechanical mimicry of the teacher.

A Music Education for a piano student consists of two things:

- (1) A mind trained to understand the fundamentals and construction of music, and the principles which underlie piano playing.
- (2) Hands trained to execute the will of the educated mind.

Equipped with a true Music Education, the student is materially assisted in his own playing—he can draw on his store of accumulated knowledge and make independent progress—he can understand and appreciate the artistry of others.

Lacking a Music Education, the student can only mimic the teacher—there is no musical inspiration—he has no foundation of music knowledge upon which he can build and progress.

This Composition offers the student not only the music score with authoritative pedaling, fingering and phrasing—but also the poetic idea of the composer in writing this particular number, and annotations on proper interpretation. The entire Progressive Series Course is just as complete, just as sound pedagogically and musically as this composition.

Talent in music is not essential to the acquirement of a practical education in music. The *Progressive Series of Piano Lessons* enables the music instructor to impart a Music Education with the same success and results with which academic subjects are taught in the public schools.
